Integrated Technical Services

Why Choose Us?

- Comprehensive technical expertise
- Integrated services under one roof
- MOF certified trading capabilities

Our Core Services

Wastewater Analysis

Wastewater Analysis includes comprehensive testing services to ensure regulatory compliance, environmental protection, and operational efficiency.

Grease & Lubricants Analysis

Grease & Lubricants Analysis provide detailed analysis of grease and lubricant samples to assess quality, monitor equipment condition, and identify early signs of wear or contamination.

Animal Feed Analysis

Animal Feed Analysis offers accurate laboratory analysis of animal feed to verify nutritional composition, detect contaminants, and ensure product consistency.

OEM Service

Our OEM services are conducted within a GMP-compliant laboratory environment, ensuring controlled production standards, quality assurance, and regulatory readiness.

Trading

MOF-registered trading services providing reliable sourcing and compliant procurement solutions.

From routine testing to complex technical demands, we customize every service to you.

Our Laboratory

Precision • Performance • Partnership
