“Specialty Lubricants & Functional Fluids Portfolio”

Formulation • Application • Performance

Oils & Lubricants Division

About Us !

We develop and supply specialty lubricants and functional fluids tailored to specific operating, regulatory, and environmental requirements. Our focus is not volume-driven products, but application-fit solutions designed to perform under defined conditions, standards, and constraints.

- 1. Application-specific formulation strategy**
- 2. Bio-based and conventional systems**
- 3. Compatibility with industrial and regulatory requirements**
- 4. R&D and technical support driven**

Bio-Degreaser

Food-Grade Grease

Multipurpose Grease

Product Range

01 Food-Grade Grease

Formulated for incidental food contact environments

Bio-Degreaser 02

Effective oil & grease removal with biodegradable formulation

03 Bitumen

Bitumen solutions for industrial related applications

Bio-Hydraulic Oil 04

For environmentally friendly operations

05 Bio-Gear Oil

Biodegradable formulation for gear performance & protection

Customization

Product selection and formulation are driven by operating conditions, compliance needs, and performance expectations.

Technical discussion, product alignment, and formulation customization can be explored based on application requirements.

Discussion • Formulation • Application

Certifications

Selected products within our portfolio are developed with consideration for applicable certification, regulatory, and quality system requirements depending on client needs.
